

OSR 3.03

Hull Construction Standards (Scantlings)

A submission from the Vice-Chair of the Special Regulations Sub-Committee

Purpose or Objective

To clarify the requirement to have a World Sailing Certificate of Plan Review.

Proposal

3.03 Hull Construction Standards (Scantlings)

Mo0,1,2	3.03.1	If a monohull with a Primary Launch after 2009
Mo0,1,2	a)	less than 24 m (78'-9") LH shall:
	i	be designed, built and maintained in accordance with the requirements of ISO 12215 Category A
	ii	have a World Sailing / ISAF building plan review certificate issued from a notified body recognized by World Sailing, unless higher classification has been obtained from a Classification Society recognised by World Sailing. World Sailing will publish a list of waived plan review certificates.

Current Position

As Above.

Reasons

1. It is clear which classifications would be acceptable in place of a WS Certificate of Plan Review.
2. To date there have not been any waived WS Certificates of Plan Review as a result of higher classification being obtained.
